Mohammad Hossein Moradi

PHP / WordPress Backend Developer

Tehran, Iran | moradi.mh93@gmail.com | github.com/mhmoradi93 | mhmoradi93.github.io

PROFILE

Software developer focused on PHP backend development, custom WordPress plugins, REST APIs, MySQL data models and production-ready product workflows. Recent work includes building Shenasnapet and Hoviateman, two QR-based startup products with custom dashboards, public profiles, authentication, payments and responsive interfaces.

CORE SKILLS

PHP / WordPress: OOP PHP, custom plugins, custom themes, hooks & filters, shortcodes, AJAX, REST API, WooCommerce
Backend / Data: MySQL, relational modeling, service/repository patterns, authentication, access control, integrations
Frontend / Product: HTML, CSS, JavaScript, mobile-first UI, dark mode, bilingual interfaces, onboarding, subscriptions and payment workflows
Tools: Git, Gravity Forms, WordPress debugging, production troubleshooting

SELECTED PROJECTS

Shenasnapet — Founder / Product Developer

QR-based pet identity and profile platform | shenasnapet.ir/home-en/

- Designed and developed a custom WordPress plugin and custom theme with a dedicated MySQL data model.
- Built REST API workflows for pets, tags, profiles, scans, lost cases, sightings and contact requests.
- Implemented authenticated dashboards, QR tag activation, pet-to-tag connections, subscriptions, orders and payment flows.
- Built bilingual Persian/English UI, dark mode, mobile-first layouts, AJAX image management and privacy-aware Lost Mode.

Hoviateman — Product Developer

QR-based digital medical identity platform | hoviateman.ir

- Built WordPress-based registration, profile management, authentication and QR public-profile workflows.
- Worked with PHP, MySQL, Gravity Forms, SMS authentication and structured product / identification-code management.

PROFESSIONAL EXPERIENCE

Technical Support & UI Implementation — Dadeh Kavan Andisheh Bartar

2016–2022 | 70 months | Tehran, Iran

- Provided technical support for internal and customer-facing systems and helped diagnose software and operational issues.
- Contributed to UI implementation and visual execution for software interfaces.
- Worked in a technology environment focused on big-data analytics, data warehouses, business intelligence and data mining.

Earlier — Gameplay Programmer / Independent Game Developer

Built mobile game prototypes and gameplay systems using C++ and Unreal Engine Blueprints.

EDUCATION & TRAINING

B.Sc. in Software Engineering — Islamic Azad University, North Tehran Branch | 2012–2021

Selected training: Object Oriented Programming (35h); ASP.NET Comprehensive Course (79h); SQL Server 2014 Design & Implementation (50h); Querying Microsoft SQL Server 2014 (40h); Website Design (45h); Google Analytics for Beginners.

AVAILABILITY

Open to remote roles and relocation opportunities with international, English-speaking teams.
